

# Intro to Digital Brains

Or;

Learning about KMS programs!

Brought to you by Courtney Herber

# Today's Session:

## The Whats (today's outline):

- Courtney's Intro
- How do you keep track of your life?
- What is a KMS (or Digital Brain)?
  - Why use a KMS?
- What are some KMS programs on the market?

## The Whys (or what you take away from this):

- What is a KMS and why you might use it
- Better articulate your needs from a KMS (so that you can more easily find what works)
- The name of several different free KMS programs to try

## The Hows:

- Live Demo of select KMS programs:
  - Trello
  - Notion

## Who am I?

- An educator (for over a decade!)
- I've worked with learners from all age groups and from countries across the world
- A great big geek!!

# How do you keep track of your life?

Do you use a journal?  
Date book?  
Planner?  
Google/Outlook Calendar?  
Google Keep/Notes?  
Running to-do list?

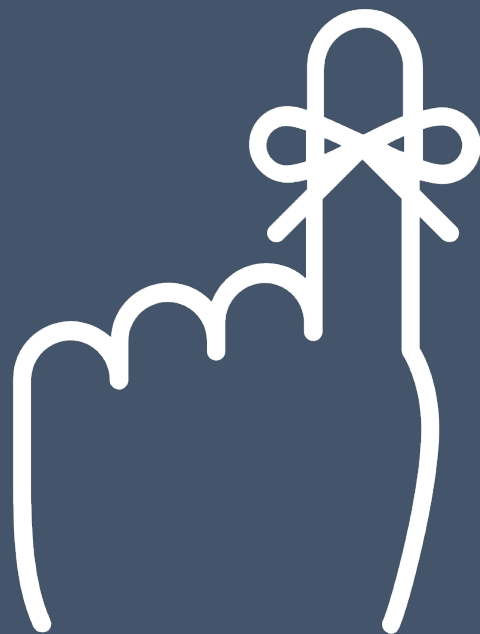

Take a moment or two to jot down the tools you use to keep all your balls in the air

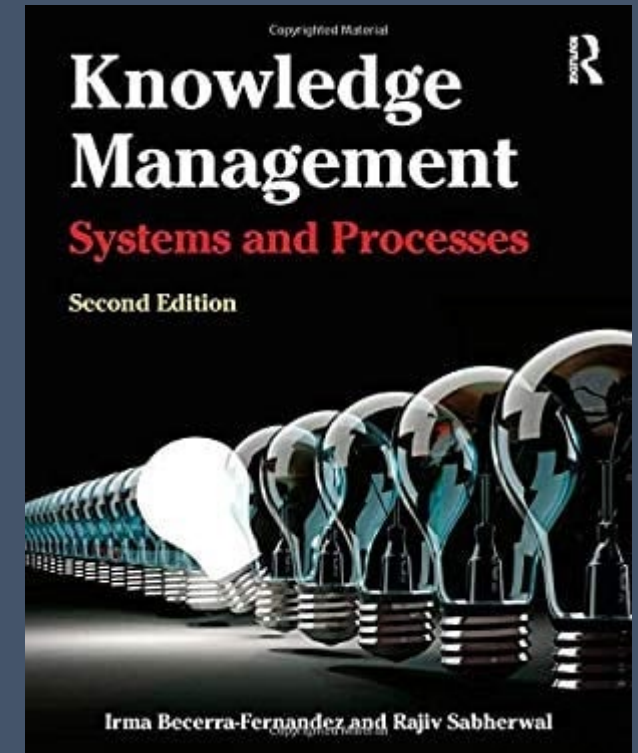

What do **you** get from each of the tools you use? Is it the most efficient tool for you?

Remember: The **best** tool is the one you use!

# What is a KMS?

- KMS = Knowledge Management System
- “In general, KM [Knowledge Management] focuses on organizing and making available important knowledge, wherever and whenever it is needed (5).”

# What are some Digital Brain programs out there?
